Recommended Background

Familiarity with basic financial concepts

Overview

This product deals with credit risk models and management of credit risk. Credit risk models provide a framework for quantifying credit risk in portfolios of traditional credit products (loans, commitments to lend, financial letters of credit), fixed income instruments, and market-driven instruments subject to counterparty default (swaps, forwards, etc.). This product focuses on: Conceptual Approach to Credit Risk Modeling, most widely accepted credit model developed by reputed agencies such as JP Morgan, Credit Suisse First Boston, McKinsey and KPMV. Managing credit risk on a portfolio level with special emphasis on active credit portfolio management approach
