# Management Accounting

## Overview

Financial decisions impact virtually every area of the business. The product 'Management Accounting' comprises of, an in-depth coverage of two crucial areas of every business i.e., Management of Current Assets & Management of Working Capital. It presents the principles and techniques of managing each element of current assets and their financing. Basic theories & important formulae have also been discussed in each course. As any theory can be best understood by its application, each course in this product exhibits step-by-step approach in solving problems by 'do and learn' policy. Thus the product explores the theory with relevance to the real-world business problems through analytical approach. These courses are intended to familiarize you with the basic concepts and to apply the same in practice at intermediate and advanced level.
